

## PHP Pet Shop Appointment using PHP

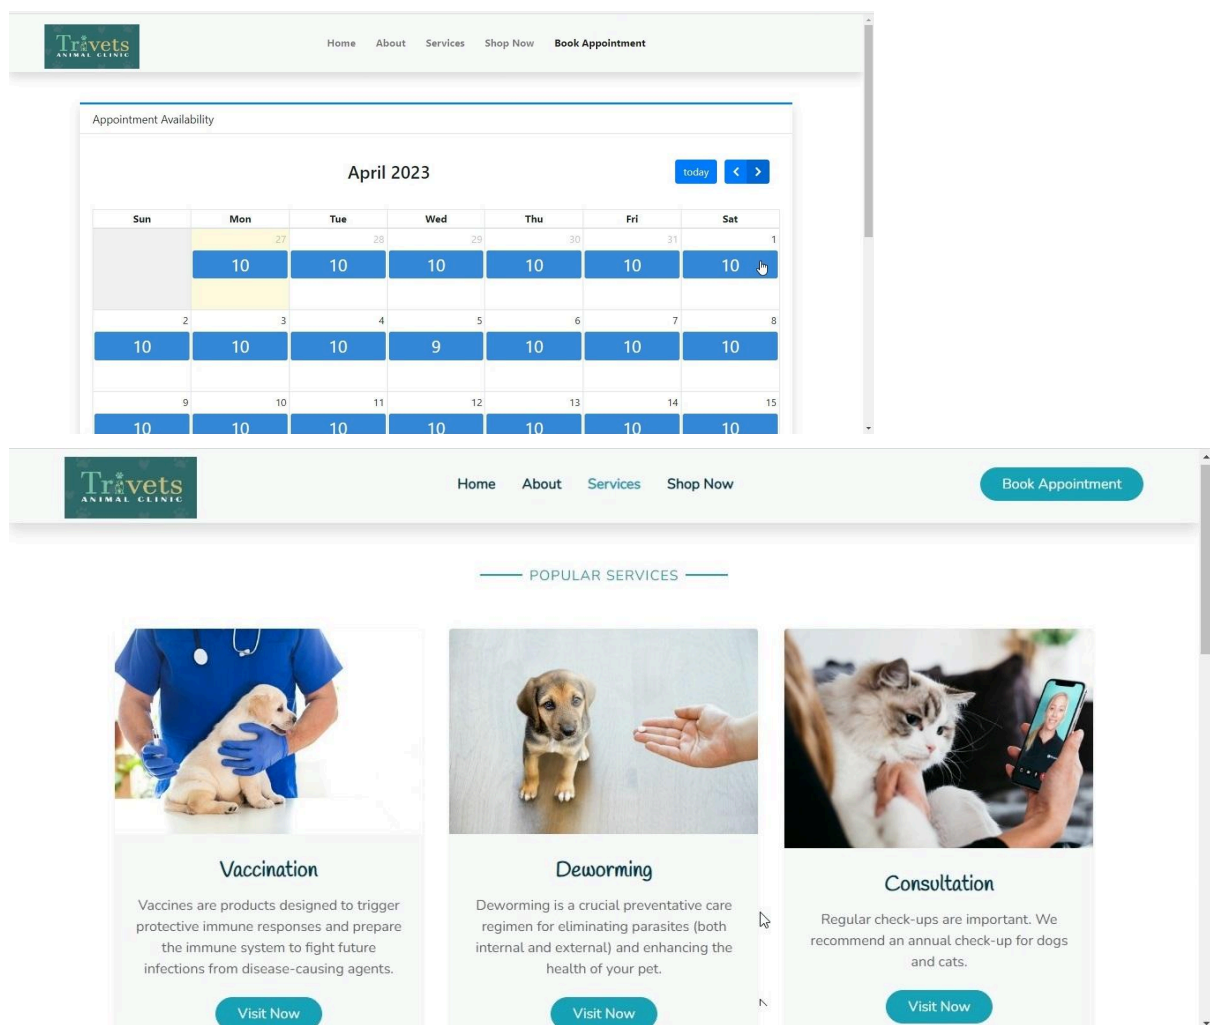

Github repo : <https://github.com/Eunijoy/Appointment-PHP.git>

**Tech Stack:** PHP, HTML, CSS, JavaScript, MySQL

Trivet is a dynamic web application designed to streamline pet care services by enabling online appointment booking and product shopping—all in one platform. Built using PHP and MySQL, it allows pet owners to easily schedule grooming, vet check-ups, and other services while browsing and purchasing pet essentials directly from the interface.

Key features include a calendar-based appointment system, real-time availability checks, and a user-friendly product catalog with cart functionality. Admins can manage bookings, update inventory, and track transactions through a secure backend dashboard.

This project showcases my backend development skills with PHP, form validation, and CRUD operations, while combining intuitive UI design for a seamless user experience. Trivet reflects my commitment to building useful, scalable tools that enhance everyday workflows in niche industries.

LEARN ABOUT US

## Best Clinic for your Pet

Trivets Animal Clinic and Grooming Center are a small animal clinic located at Calabanga, Camarines Sur. The clinic was founded in December 3, 2021 by Dr. Karl Robert Ador and Dr. Tin Bornel as a mixed animal practice (both small and large animals). We began with a minimal investment and a lot of patience, yet we eventually chose to concentrate our efforts on small animals in order to better serve our clients. Our clinic was built on the premise of providing honest, high-quality care in a pleasant environment, and we continue to strive to provide this to each and every patient we meet.

- ✓ Trusted Clinic
- ✓ Clean and Safe
- ✓ High Quality Services
